Summary

On Tuesday January 16, 2019, I met with Superintendent Erika Pinkerton and the Enterprise SD Safety Committee. We discussed various campus security concerns and toured the campus together. This report contains my professional input on these same matters. I have also emailed Erika with related information such as campus security training/workshop opportunities, etc.

Close Summary

A report on my 1/16/2019 Voluntary Risk Management Consultation with Superintendent Erika Pinkerton and the Enterprise SD Safety Committee was crafted and sent to Erika on 1/17/2019.

	Develop an emergency preparedness plan designed to address all known threats, including natural disasters, threats from within, and threats from without. Practice the prescribed emergency response drills on a regular basis, beginning with the reunification routine. Establish an incident command system. Assign staff to periodically review and update the plan. Take care to consider the safety of special needs students in your plan. The plan should include the distribution of classroom emergency evacuation kits containing items such as a first aid kit, walkie-talkies, radio, food bars, drinking water, emergency blankets, flashlights, light sticks, wet wipes, etc.. It should also include five-gallon buckets containing classroom lockdown kits with items such as a toilet seat, waste bags, toilet tissue, wet wipes, absorbent cat litter, latex gloves, etc.	Moderate	Staff Assessed	Enterprise School District - Main School Bldg
	Install security cameras all around your campus. Make sure that they are night-vision capable and feature clarity at a distance, preferably with zoom capability. Post them at all sensitive areas in out-of-reach locations designed to minimize the risk of vandalism. Install a visual monitoring system which enables school staff to easily view and review incidents from the comfort of their cell phones, laptops and desktop computers. 	Inspect, maintain and when necessary, improve outdoor and indoor lighting, the exterior building envelope, and landscaping. Light is the best anesthetic. Anything you can do to eliminate potential hiding places, safeguard against illicit entry, and eliminate the risks associated with surreptitious movement across your campus will help to improve school security.	Moderate	Staff Assessed	Enterprise School District - Main School Bldg
	Add security cameras, intercom and auto-locking doors to the ES entryway vestibule so that office staff can monitor and control access to the building. Remodel office access to vestibule to improve communication and sightlines. May want to install an office counter there.	Moderate	Staff Assessed	Enterprise School District - Primary School
	Expand HS entryway vestibule so that inside doors are located on the opposite side of the office entry door. Add security cameras, auto-locking doors and intercom so that the office staff can monitor and control access to the building. Expand/remodel office counter for improved sightlines and communication.	Moderate	Staff Assessed	Enterprise School District - High School & Office Bldg
	Consider installing reflective film at locations where school windows allow unfettered sightlines from outside the building to staff and/or students. Film options range from those that are merely reflective to others which also feature high-tensile breakage resistance.	Moderate	Staff Assessed	Enterprise School District - High School & Office Bldg

Photo	Recommendation	Level	Status	Property
	Install security fencing around perimeter of school to maintain safe passage between campus buildings. Fencing should be constructed to discourage dangerous intruders from entering campus while also allowing for swift and orderly staff/student exit in case of an emergency.
